

## 4 Inloaders for jumbo glass

Italcarrelli has once again, increased its range of inloaders for the transport of glass on racks with the PTN420. This new machine, says the company, has the same features as the PTN330 but with a load capacity of 42 tons compared to the capacity of 33 tons of the previous models.

This higher capacity of 42 tons enables the transport of jumbo-sized laminated glass sheets to the autoclave. Moreover, despite its higher capacity, the PTN420 has maintained

the same dimensions as the previous models with regards to the area of pick-up of the racks and is therefore, says Italcarrelli, also compatible for the transport of normal racks for jumbo glass.

As far as loading and unloading of jumbo glass into the autoclave are concerned, Italcarrelli is presently constructing new models of platform loaders with capacity up to 55 tons.
